

DEPT. OF TRANSPORTATION  
DOCKET SECTION58495  
051995843-12 99 JUL -1 AM 10:59

I am a resident of Wayne County, KY and I am opposed to changing our time zone. I am employed in the eastern time zone however, I find that having that extra time by the time I return from work to home very nice. I don't feel that businesses loose any time since they have extra time of the afternoon on central time to confer with their associates in the eastern time zone. Schools starting later would very much affect the working parents, as daycare in this area is limited with so many of the families living in the rural areas. The daycare providers in town are all filled with waiting lists now. I am opposed to children being on their own in the early morning hours in our rural area as I think that it could potentially increase our crime rate as well as school related problems at the bus stops. As for the state representatives feelings that central time zone will prevent Wayne County from moving forward economically, time really has no bearing on this as we have grown tremendously in the nine years that I have been a resident.

Thank You

Brenda Jones
